UC: Manage calendars

1. Use-Case manage calendars

1.1 Brief Description

The use case manage calendars is a CRUD use case. You can create, read, update and delete a calendars' metadata. Except for deleting which also deletes all related data like appointments, the changes only affect the calendars metadata.

1.2 Stored data

1.2.1 Overview

Name	Auto-assigned	Unique	Mandatory	Modifiable
Id	Yes	Yes	Yes	No
Name	No	Yes	Yes	Yes
Description	No	No	Yes	Yes
Color	No	No	Yes	Yes
Creator	Yes	No	Yes	No

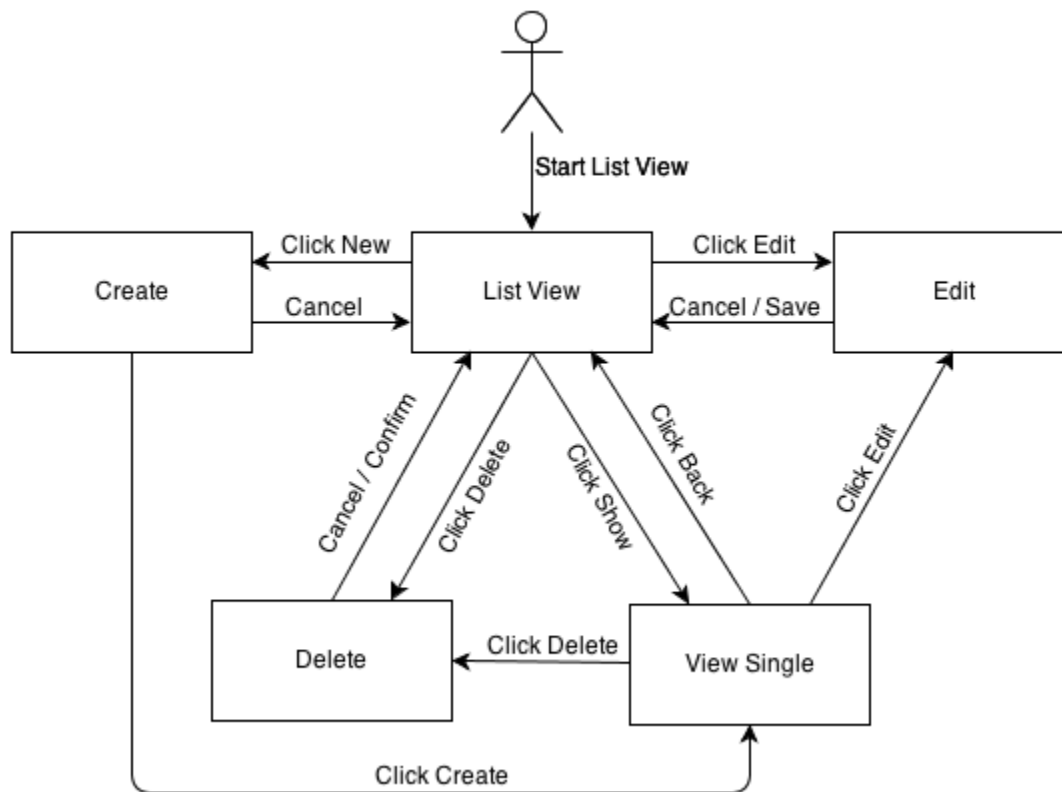

1.2.2 Description

The metadata consists of the name of the calendar, a short description and a color for better differentiation when viewing more than one calendar at the same time. Also there is a creator saved, but the creator is automatically set as the user who creates the calendar and it is not possible to change the value later.

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

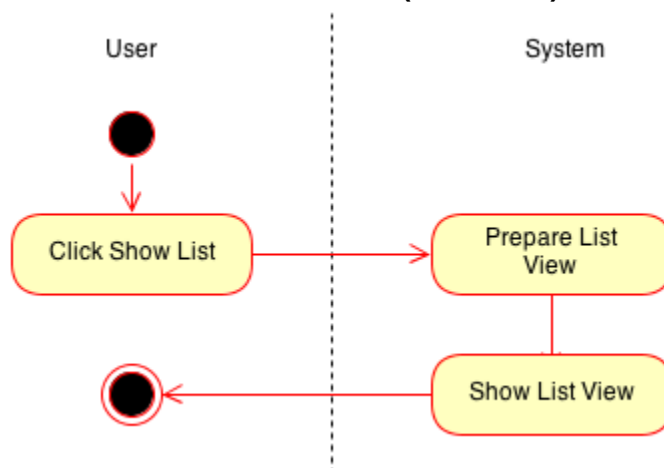

2. Flow of Events

2.1 Screen Flow

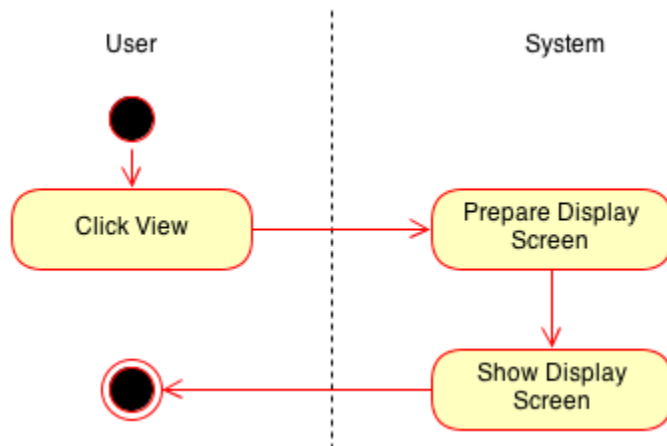

2.2 Use Case Flows

2.2.1 Show all calendars (List View)

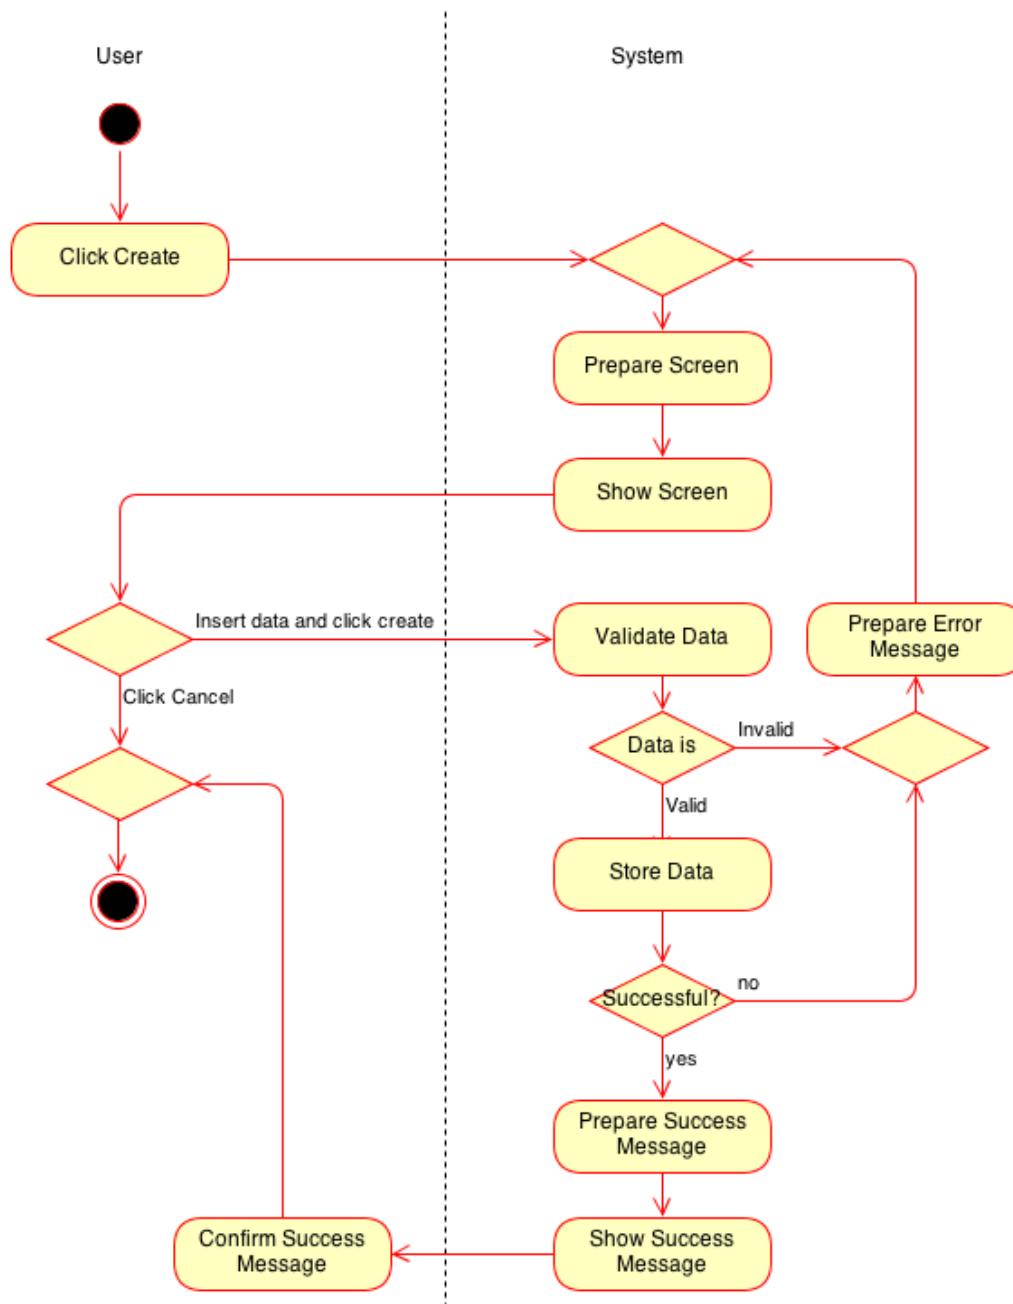

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

2.2.2 Show single calendar (View Single)

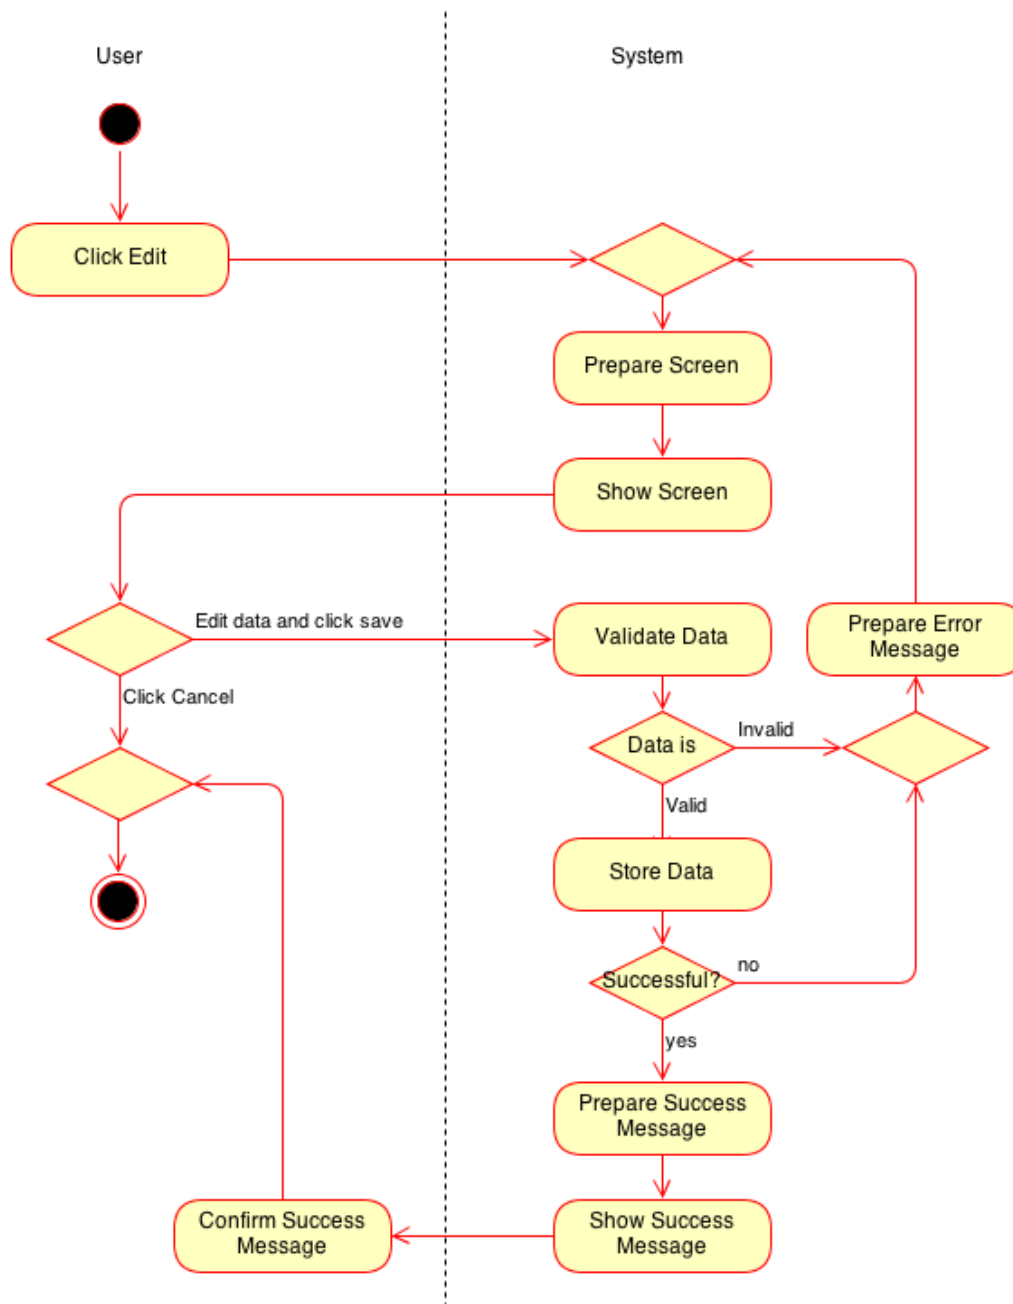

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

2.2.3 Create new calendar (Create)

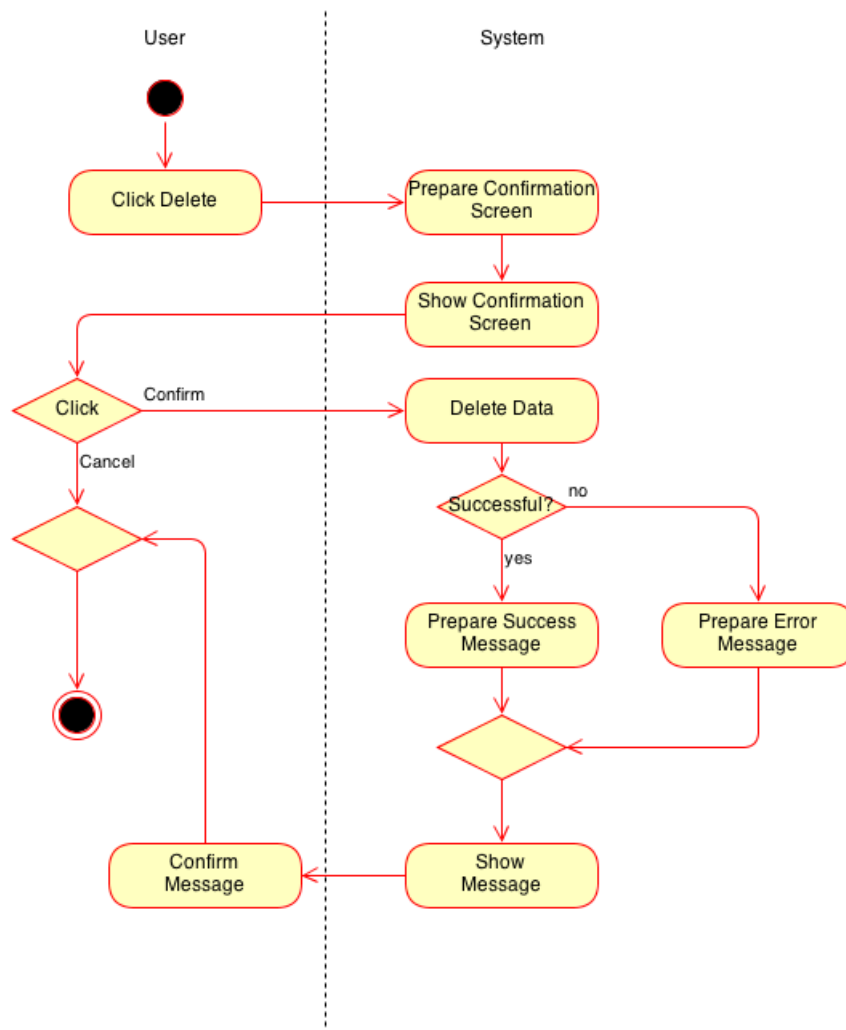

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

2.2.4 Edit calendar (Edit)

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

2.2.5 Delete calendar (Delete)

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

3. Special Requirements

n/a

4. Preconditions

4.1 Rights

View/edit/delete/create: The user must have the rights to do the operation.

4.2 Calendar

View/edit/delete: The calendar must exist.

Create: The calendar must not exist.

5. Postconditions

5.1 Calendar

Edit: The calendar metadata is updated

Delete: The calendar is deleted

Create: The calendar is created

6. Extension Points

n/a

7. Cucumber test scenario

Feature: manage calendars

As an user

I want to manage calendars

So that I can create and manage my calendars

Scenario: create calendar

Given I am logged in

And I am on the "calendar list"

And I clicked "create calendar"

When I type in the correct calendar data

And I click "create"

Then I should see a confirmation message

Scenario: delete calendar

Given I am logged in

And I am on the "calendar list"

And I clicked "delete calendar"

When I confirm the deletion

Then I should see a confirmation message

8. Mockups

8.1 Show all calendars

The mockup shows a web browser window titled "project-cm calendar" with the URL "https://project-cm.com/calendar". The page displays a list of calendars under the heading "Calendars". A "New" button is located in the top right corner of the list area. The list contains three entries: "Private" (owner: Andreas, color: Red), "Work" (owner: Andreas, color: Blue), and "Sports" (owner: Tobias, color: Green). Each entry has "View", "Edit", and "Delete" buttons. Below these are several empty rows for additional entries.

Name	Owner	Color	View	Edit	Delete
Private	Andreas	Red	View	Edit	Delete
Work	Andreas	Blue	View	Edit	Delete
Sports	Tobias	Green	View	Edit	Delete

8.2 Show single calendar

The mockup shows a web browser window titled "project-cm calendar view" with the URL "https://project-cm.com/calendar/view". The page displays a form titled "Calendar - view" with fields for "Name", "Description", and "Color". The "Name" field contains "Calendar Name", the "Description" field contains "Description", and the "Color" field contains "#FF7500" with a color picker icon. A "Back" button is located at the bottom left of the form area.

8.3.3 Data save failed

The screenshot shows a web browser window titled "project-cm - calendar new". The address bar displays "https://project-cm.com/calendar/new". A red error banner at the top of the page reads "internal error, failed to save data - please try again". Below the banner, the form is titled "Calendar - New". It contains three input fields: "Name" (with "Calendar Name" entered), "Description" (empty), and "Color" (with "#FF7500" entered and a color picker icon). At the bottom of the form are "Save" and "Cancel" buttons.

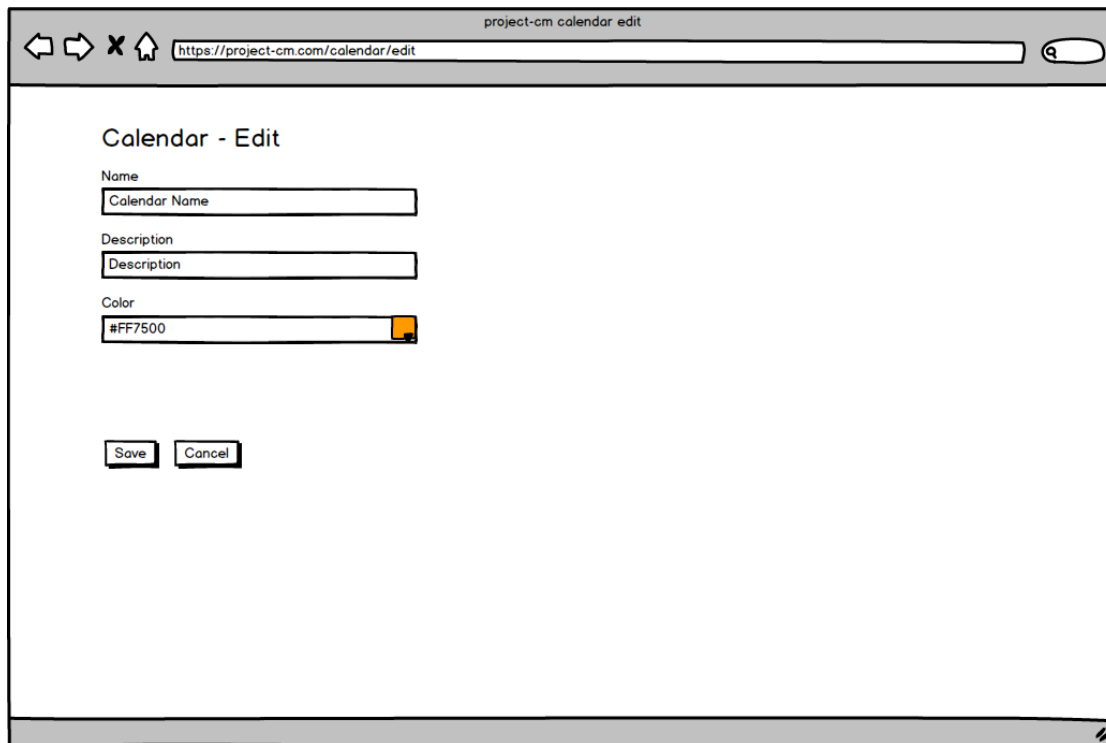

8.3.4 Success: Data stored

The screenshot shows a web browser window titled "project-cm calendar view". The address bar displays "https://project-cm.com/calendar/view". A green success banner at the top of the page reads "New entry successfully created". Below the banner, the form is titled "Calendar - view". It contains three input fields: "Name" (with "Calendar Name" entered), "Description" (empty), and "Color" (with "#FF7500" entered and a color picker icon). At the bottom of the form is a "Back" button.

8.4.3 Error: Data save failed

The screenshot shows a web browser window titled "project-cm calendar edit" with the URL "https://project-cm.com/calendar/edit". A red error banner at the top reads "internal error, failed to save data - please try again". Below the banner, the form is titled "Calendar - Edit" and contains three input fields: "Name", "Description", and "Color" (with a color picker showing #FF7500). At the bottom are "Save" and "Cancel" buttons.

8.4.4 Success: Data stored

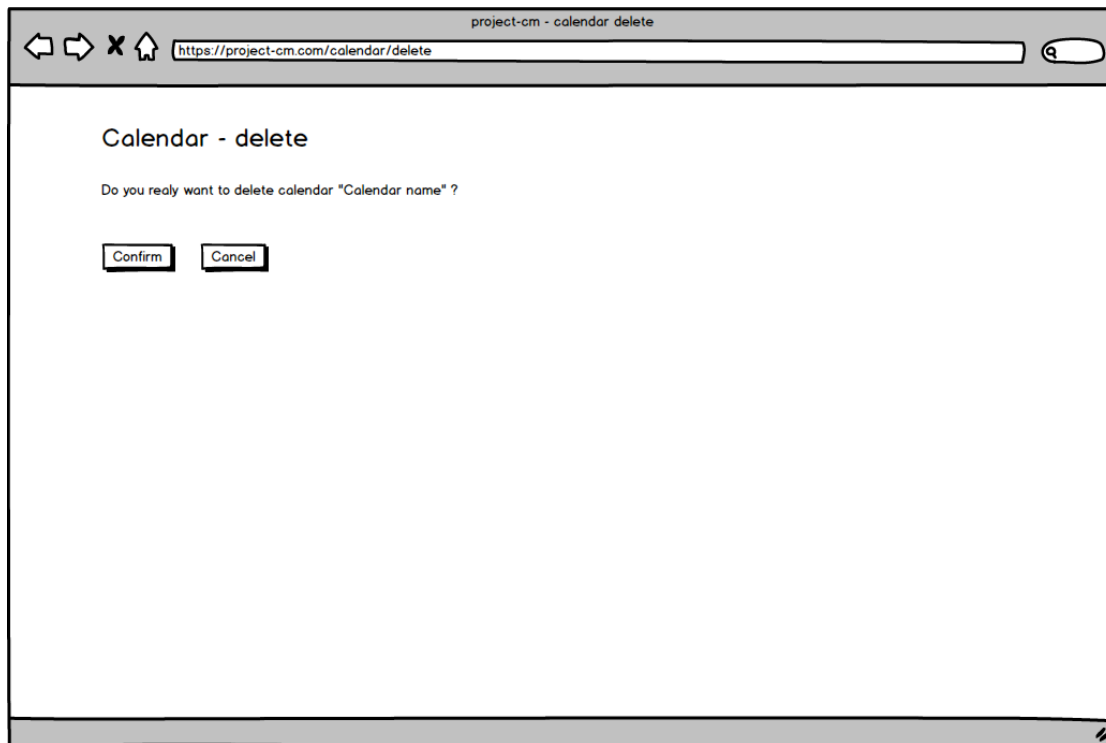

The screenshot shows a web browser window titled "project-cm calendar" with the URL "https://project-cm.com/calendar". A green success banner at the top reads "data edited successfully". Below the banner, the page is titled "Calendars" and features a "New" button. A table lists the calendars with columns for Name, Owner, Color, and action buttons (View, Edit, Delete).

Name	Owner	Color			
Private	Andreas	Red	View	Edit	Delete
Work	Andreas	Blue	View	Edit	Delete
Sports	Tobias	Green	View	Edit	Delete

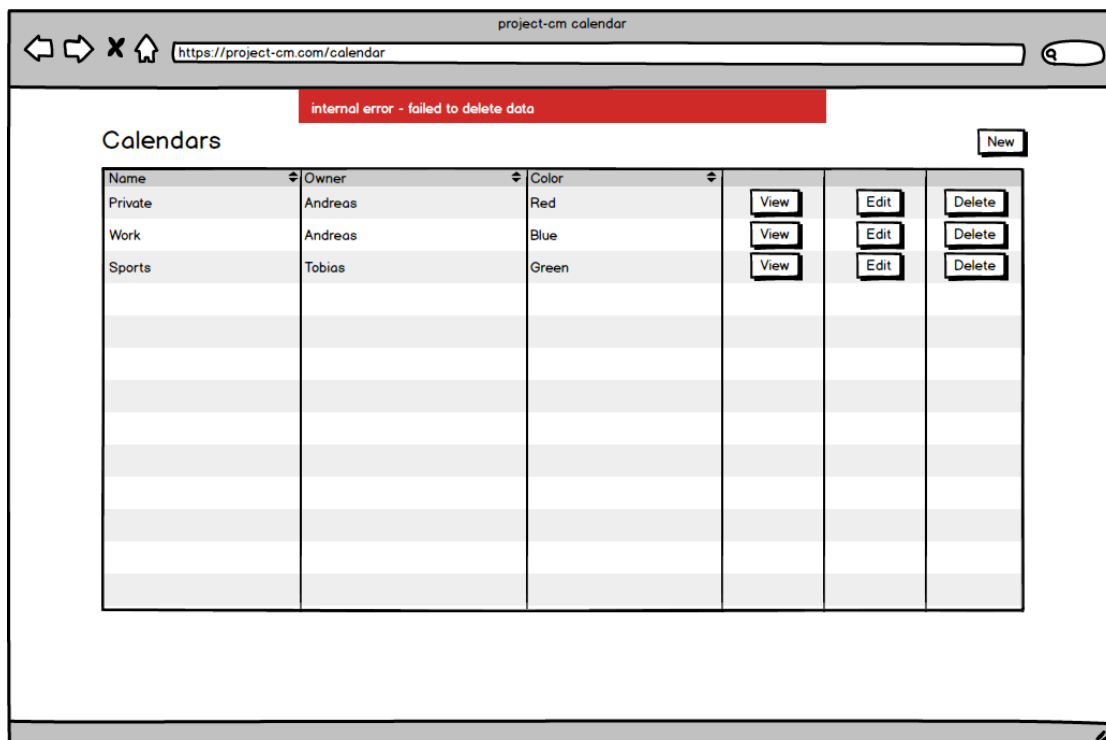

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

8.5 Delete calendar

8.5.1 Confirm view

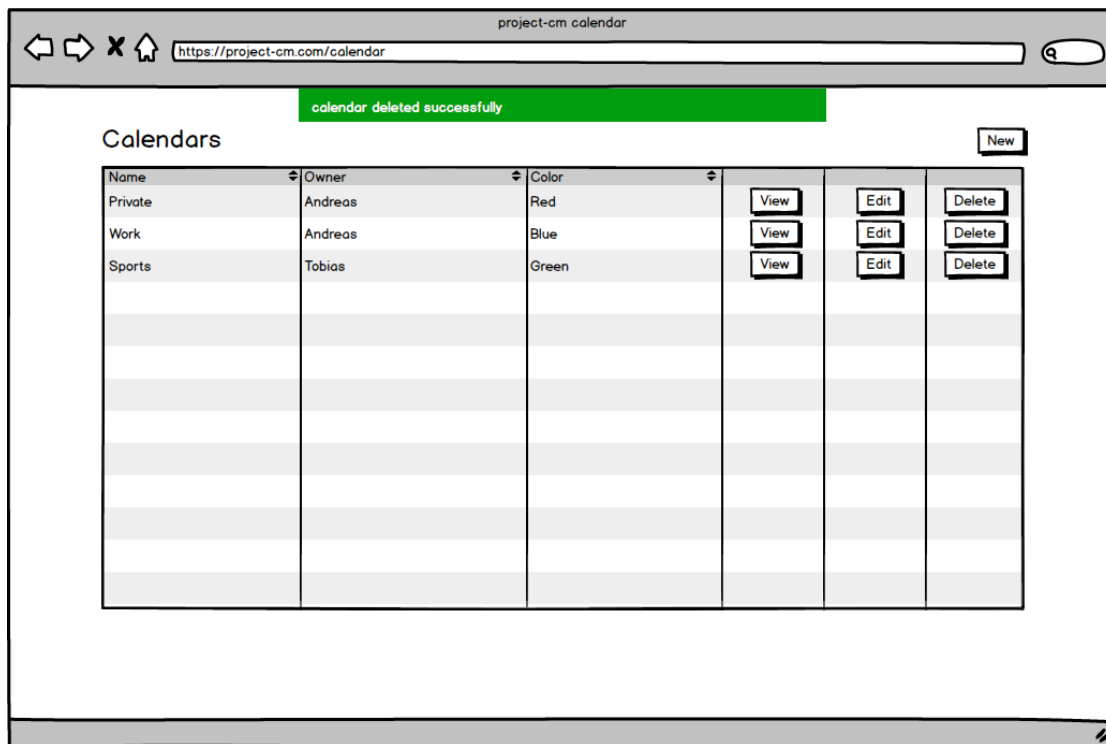

8.5.2 Error: Deletion failed

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

8.5.3 Success: Data deleted

Project CM	Version: 1.2
UC: Manage calendars	Date: 09/Apr/2014

9. Function Points

Below you can see the function point calculation for this use case.

	Manage Calendars
Domain Characteristic Table	
Number of User Input	5 Simple
Number of User Outputs	5 Simple
Number of User Inquiries	3 Simple
Number of Files	5 Simple
Number of External Interfaces	1 Simple
Complexity Adjustment Table	
Does the system require reliable backup and recovery?	3
Are data communications required?	4
Are there distributed processing functions?	2
Is performance critical?	0
Will the system run in an existing, heavily utilized operational environment?	0
Does the system require on-line data entry?	5
Does the on-line data entry require the input transaction to be built over multiple screens or operations?	5
Are the master files updated on-line?	2
Are the inputs, outputs, files or inquiries complex?	1
Is the internal processing complex?	1
Is the code to be designed reusable?	0
Are conversion and installation included in the design?	0
Is the system designed for multiple installations in different organizations?	0
Is the application designed to facilitate change and ease of use by the user?	0
Function Points	74
